

Retail Sales Analytics Dashboard - README

Project Overview

This project demonstrates an interactive Excel dashboard built using Pivot Tables, Pivot Charts, Slicers and a Timeline based on a retail sales dataset.

Dataset Source

Retail Sales Dataset from Kaggle

<https://www.kaggle.com/datasets/mohammadtalib786/retail-sales-dataset>

Workflow

- Download dataset from Kaggle and open in Excel.
- Convert data into an Excel Table (Ctrl+T).
- Clean the data (check blanks, duplicates, formats).
- Create helper columns: Month, Month_Sort, Day, Day_Sort, Age_Group, Weekday_Flag.
- Create Pivot Tables for KPIs.
- Create Pivot Charts.
- Insert Slicers (Gender, Product Category, Age Group, Weekday Flag).
- Insert Timeline using Date.
- Connect all slicers to all Pivot Tables.
- Create KPI cards using linked Pivot values.
- Format dashboard with dark theme.

KPIs

- Total Revenue
- Total Orders
- Quantity Sold
- Customers
- Average Order Value
- Average Unit Price

Charts

- Monthly Revenue Trend
- Revenue by Product Category
- Revenue by Gender
- Revenue by Age Group
- Quantity Sold by Category
- Category vs Gender
- Weekday vs Weekend
- Revenue Contribution (%)
